

(a) **Problem: Area of right triangle with legs 3, 4**

A) $A = \frac{1}{2} \cdot 3 \cdot 4 = 6$

generator $\rightarrow$ CE = 2.1
verifier $\rightarrow$ CE = 0.4

B) $A = 3 \cdot 4 = 12$

generator $\rightarrow$ CE = 2.3
verifier $\rightarrow$ CE = 5.2

$\Delta CE_{\text{gen}} = 0.2$ (ambiguous) | $\Delta CE_{\text{ver}} = 4.8$ (separates)
